

Farma Bio-Saalberghof Berghaus

1. úvod

Farma Bio-Saalberghof majiteľa Rasmusa Berghausa je držiteľom ceny v nemeckej súťaži "Poľnohospodárstvo vytvára kultúrnu krajinu" za rok 2008. Všetky zvieratá na tejto farme žijú podľa noriem organickej výroby. Bio-Saalberghof je certifikovaný poľnohospodársky organický podnik, ktorý prevádzkuje európsku bio značku a od roku 2014 je členom organizácie organického poľnohospodárstva "Biokreis". Chová sa tu dobytok čelade Höhenvieh, sliepky, kačice a ošípané. Miestne pastviny sú dôležitou podmienkou pre kvalitu mäsa. Výrobky sú priamo distribuované do pekárne, ktorá je v čiastočnom vlastníctve rodiny. Podnik je založený na komplexnom a transparentnom systéme udržateľnosti, regionálnosti a na kvalitnom organickom druhovo-vhodnom chove.

Popis Farm

Mr Berghaus revitalized the dormant agricultural enterprise (approximately 5 ha in agricultural and silvicultural lands) of his parents as his first daughter was born in 2003. He started with 2 ha of agricultural land and 4 ha of leased land. He converted 2 ha of his own forest into a pasture. This was possible with a special permission. He has constantly cultivated extensively and used the funding possibilities in the frame of the nature protection contract. The enterprise has grown yearly by approximately 5 to 10 ha. He was offered lands that were considered inferior in other people's eyes.

In 2010, he was offered 30 ha at once for lease, since the farmer, who was adjusting his enterprise at the time, was convinced of the method of cultivation of Mr Berghaus.

He also took over this surface and decided to commit himself from now on to agriculture in full extent. In order to achieve this, two further selling points of the bakery run by the family were abandoned. Today it only operates in one segment: the baked goods as well as the own products from the agriculture and regional goods from the established, regional network.

The herd of cattle comprises approximately 45 pieces (20 mother cows, one bull, and breeding stock). During summer time, there is pension cattle on the fields as well. The herd is then counting around 130 animals.

Voľný text

The enterprise is located in the landscape conservation area of Sauerland mountains, more precisely in the South of the Märkischer Kreis and in the western part of the Sauerland. In Volmetal starts its passage through the North-West here. In the North, the district is limited through the Ruhr valley, while the southern part of the district is very hilly. Towards the East, the Ebbe mountains stretch. To the West, the municipality is surrounded by the Bergische Land. The highest elevation in the urban area is situated 652 m high near the Nordhelle bei Valbert, the enterprise location. The Nordhelle is the highest elevation in the Märkischer Kreis.

The cows on the farm are fed by home-grown organic hay and organic haylage, organic cereals and organic potatoes.

The cows and beef cattle are in the pastures from May until November. Since November 2014, the enterprise is the member of the Biokreis (<https://www.biokreis.de/index.php>).

At the farm, all the animals are kept in species-appropriate manner: pigs and chickens move around straw and have a lot of space to move.

Laying hens, ducks and geese are kept in free-range husbandry with a lot of outlet and grazing area and there is a swimming pond for the ducks.

They are fed with home-grown organic cereals, organic potatoes, soja and pea middlings as well as bread remnants from the bakery. The feeding of the bread remnants to the pigs and the poultry led to the creation of separate agricultural enterprise, since it does not comply with the organic guidelines. Even though the bread remnants originate from their own bakery.

The enterprise implemented the principle of reasonable regional business in full consequence. The combination of agriculture and direct sale and the family bakery enterprise constitutes with current regional cooperations a very stable family enterprise and thus strengthens the economy on-site.

School classes and kindergarten groups also come regularly to the enterprise in order to directly experience the agriculture and the nature.

Through this kind of agriculture, the enterprise contributes to:

- Preservation and strengthening of the biodiversity;
- Preservation of traditional domestic animal breeds;
- Preservation of traditional cultivation techniques;
- Reduction of the soil erosion;
- Promotion of the value of the landscape;
- Production of qualitative, safe and healthy food.

Rady/ Odporúčania

"Site, cultivation system, animal breed and marketing have to be consistent!"

"Public relations and awareness of an educational task by schools and kindergartens is very important. We practice it with passion!"

5. Dôležité informácie, školenia / kompetencie a otázky

Všeobecné úvahy

It is essential for a farmer to deal with the specific site conditions on-site: climate, altitude, soil qualities. These are restrictions but in the majority of cases also special chances.

Within 7 years, Mr Berghaus started from 0 to 100 and built up a full lively hood in the agriculture, and this not against but towards the nature and the cooperation / conjunction of agriculture, nature protection, species protection and landscape.

Even if duration of 7 years seems short for an agricultural business project, Mr Berghaus shows crucial competencies to be successful in the field of organic and regional production as well as in sale within regional added value chains.

He not only respects but highlights the landscape and shows a model of adapted agriculture to the specific location and area. He follows an integrated approach of sustainability for farming, nature and landscape.

In any case, it is important to be well informed about the existing resources. At some point, it is necessary to focus and concentrate. Like Mr Berghaus did in concentrating on just one own shop for selling his products.

Strengths	Weaknesses
<ul style="list-style-type: none"> • Niekoľko pilierov. • Marketing. • Ochrana prírody. • Existujúci zákazníci z pekárenského predaja. 	<ul style="list-style-type: none"> • Závislosť na dotáciách.
Opportunities	Threats
<ul style="list-style-type: none"> • Priestor na rast. • Veľké možnosti pri uvádzaní na trh. 	<ul style="list-style-type: none"> • Systém a koncepcie sú jedinečné, ale kopírovateľné • Škandály v potravinárskom odvetví vždy budú a potenciálne môžu ovplyvniť farmy.

Main Training/Skills/Competences

Mister Berghaus is very well trained in bakery craft. He acquired the agriculture skills by practice. His cultivation methods are today largely appreciated - also by his large customer base.

He is very open for possibilities of interfacing ecology and economy and also open for regional cooperation.

Today Mr Berghaus has not only large experience in producing but as well in selling the products. Without this basic skills in cooperation and communication, it would have been impossible to make it this way.

Starting from almost zero means a free field to work, but of course not having lots of reserves in the back.

So from the attitude point of view, he had to trust his vision and his plans and he had to be willing to invest time, energy and of course, money.

He took an entrepreneurial risk.

Otázky

- Starting a farm from almost nothing is a challenging task. To reach a level allowing the whole family to live off the farm's income is not easy, but it is possible following a clear concept. Do you have and follow a clear concept on your farm?
- The challenge to combine cost effectiveness and ecological added value at the same time ended up in excellent way and chance for sale of the farms products. Are you satisfied with your way of production and sale?
- Biodiversity maintenance and the preservation of visual landscape character and keeping of traditional breeds are connecting the farm with the community again. Do you see a chance to interact and connect with the community through landscape?
