

# Farma - Marijan Bavcon

## 1. úvod

Mesto Cerčno leží na západe Slovinska na križovatke predalpínských údolí, obklopené strmými, zalesnenými svahmi v nadmorskej výške 324 m. Žije tu približne 4700 obyvateľov, čo predstavuje 36 obyvateľov na kilometer štvorcový. Poľnohospodárstvo nie je veľmi dôležitá hospodárska činnosť. V tejto oblasti sa nachádzajú niektoré úspešné priemyselné podniky, ale v poslednej dobe sa táto oblasť čoraz viac venuje cestovnému ruchu. K dispozícii je hotel s kúpeľmi a niektoré zaujímavé turistické lokality v okolí. Táto oblasť je známa tradičnou výrobou čipiek a tradičných karnevalových masiek. Okolité osady sú sústredené na svahoch alebo v širších častiach údolí. Zvyčajne sa tu nachádzajú sezónne farmy, ktoré sa zaoberajú chovom dobytky a lesným hospodárstvom. Cestovný ruch a poľnohospodárstvo sa snažia spojiť prostredníctvom zavedenia miestnych značiek pre niektoré typické miestne produkty.

## 2. Profil promotéra

**Krstné meno**

Marijan

**Priezvisko**

Bavcon

**Dátum narodenia**

1968

**Pohlavie**

Muž

**Vzdelanie**

Secondary vocational school - electrician

## 3. Profil farmy

### Address

Bevkova 20, 5282 Cerkno

<b>Part time</b>	5	0

### Popis Farm

It is typically part-time farm. It provides its members with only part of their income, which is mostly acquired outside the agricultural activities. The area is among the more economically successful in Slovenia, with a low unemployment rate. The farm is situated on the outskirts of the village of Zakriž, 2 km from the urban settlement, in the protected area of Natura 2000. The family does not live on the farm but in an urban area 15 minutes away. The farm is divided into more parcels, of which only about 2 hectares of pasture, garden and orchard are around the farm. In addition to the farm house, there are also some traditional farm buildings (stable, hayrack, lope). Agricultural activity is largely intended for the self-supply of the family and close relatives. Sheep breeding, fruit processing, vegetable production and forestry are the main activities. The farm will remain part-time also in the future, but agriculture is by no means intended to be abandoned. They will seek for possibility of introducing some market-interesting traditional agricultural products. The potential successor of the farm is attending school with agricultural program.

Traditional land use

#### **Voľný text**

The Cerknó Hills (in Slovenian: Cerkljansko hribovje or Cerkljansko) is a transitional region between the Alpine and the Dinaric landscape, centred in Cerknó in north-western Slovenia. Several passes in this area connect the Poljanska Valley and the Selška Valley with the Idrija Valley and the Soča Valley. The highest peak is Porezen (1,630 m ASL). The landscape is geologically very diverse and one of the most interesting in Slovenia in this regard. Among the steep hills, numerous ravines and valleys have been carved out by the Cerknica River and its tributaries. Cerknó hills reach an average height of 1,000 m ASL. More than three quarters of the surface is covered by forests with a large plant and animal diversity. Many hiking trails are marked and maintained and many interesting tourist spots are located nearby.

#### **Rady/ Odporúčania**

- Even part-time farms, although mostly self-sufficient, are important for the look of the landscape.

## Všeobecné úvahy

For the Bavcon family, farming is not the main activity and source of revenue. Owner of the farm has an electrical installations company. They maintain the farm because of the tradition, the attitude towards the work of the previous generations. They are strongly connected with the local community and environment. The farm represents opportunity for next generation who is still studying. The members of this generation are not yet fully determined about their own further career paths. For industrial agriculture, the area is not suitable, so the potential of the farm is seen in the development of traditional local products with a higher added value which, together with the development of tourism in this area, could generate a satisfactory income. One of the sons attends agricultural school. In agricultural school programs, students are given some information about the importance of preserving the agricultural landscape and the possibilities for the development of supplementary activities. More specific knowledge can also be gained in the training provided by the agricultural advisory service or through the projects implemented by local development agencies. There is raising awareness of the opportunities that are offered by unique and protected cultural landscape. Although there is little knowledge about the landscape elements and the farmers usually don't have a full idea of what represents the agricultural landscape and how to manage it and connect it with farm business. The Bavcon farm lies near the village Podkriž by Cerklje na Gori. It is included in one of the marked footpaths, it has a picturesque location, some interesting cultural monuments, historical sites, a detailed description on the website. The young members of the Bavcon family know and value the peculiarity of their place and they are trying to find a way to use it in connection with the development of their farm. But they say that they have enough time for concrete plans and that they are now focused on education.
